

Debt Service

Debt Service

The Debt Service is for principal and interest payments on outstanding general obligation debt issues owed by the County for all governmental funds.

MISSION

Debt Service provides funds sufficient to make annual interest and principal payments on County debt obligations borrowed for capital expenditures.

POLICY

The County may borrow money only to finance its Capital Improvement Program and other capital assets. The County's ability to achieve the lowest possible financing costs is tied directly to its fiscal management, including the existence and adherence to formal fiscal policies. Because of the significant annual and long-range cost of debt service, and to assure both taxpayers and bond rating agencies that debt levels and ability to pay debt service are actively managed.

The purpose of this policy is to provide the County with a guide to manage debt levels by evaluating the need for capital investments against the capacity to pay for financing the costs of meeting that need. The goal of this policy is to equip the County Board, Administration and taxpayers with guidelines and information that can inform good decisions on borrowing money to accomplish the fiscal and program mission of the County.

By state statute, the County's debt obligation cannot exceed 5% of the equalized value of all property in the County, including Tax Increment Financing Districts. The County continues to be in compliance with this debt limit. See "Outstanding Debt Limit" (next page).

By state statute, there is a separate property tax levy rate limits for debt service levy. The baseline for the limit is the 1992 tax rate adopted for the 1993 budget. The County continues to be in compliance with the debt levy rate.

The County's Capital Improvement plan includes projections for replacement of assets as well as anticipating investment in new assets that may be needed. The plan is expected to be updated periodically to reflect additions, deletions and other changes in assets of circumstances. It is expected that investment in operating equipment, fleet and technology will be transitioned such that acquisitions will be made through annual budget appropriations when applicable, as determined by management and the County Board.
